CAPTAIN CANOT, UTHOR OF THE GREAT BOOK JUST BE-A ING PUBLISHED, SPEAKS of HAMPTON'S

GREAT CURE OF RERUMATISM CONTRACTED UNDER TROPICAL CLIMATES. BALTIMORE, Md., June 4, 1854. Mr. Stockbridge, of the Fountain Hotel, Light street,

Dear sir: Being on the point of leaving the city, I avail myself of a few idle moments to thank you kindly for the medicine you sent me, and shich has restored me to the use of my limbs. I beg you to send me four bottles more, to carry on my voyage. Since I had the fortune to use Dr. Hampton's Vege table Tincture my confidence is so strong that, in gratitude to the proprietors of said medicine, I beg you to present my respects to them, and induce them to make it more publicly known as a sure Rheumatic cure. Having called on me on the 19th of April last, and seen me prostrated on my bed. useless in all my li abs, you can appreciate nearly as well as myself the prompt relief I received from Dr. Hampton's Tincture, and I am positive had it not been for your strong and foroible recommendations I should still have been in bed.

It is really a pity this specific should not be approved by medical men, and like all patent drugs it should suffer the imputation the public generally give to suca preparations. I myself, who was al ways opposed to a patented specific, took this medicine with reluctance, and without confidence in it, and it was only through your disinterested, friendly recommendations, and my critical situation that induced me to try this really beneficial Vegetable

You may inform Messrs. Mortimer & Mowbray that they are at liberty to make use of my name in the support of the good effects of Dr. Hampton's Vegetable lineture, as it has cured me in five weeks of a chronic Inflammatory Rheumatism, contracted under tropical climates, and of seven years' periodical duration. I have only used three bottles, and find that even the deformed parts of my hands are fast returning o taeir former untural appearance

I have been under the treatment of several physicians in London and Paris, without any apparent benefit; also, while in New York, having tried the Phompsonian and domospathic remedies, after having been tormented with galvanic ba teries, cold and aromatic baths, and hundreds of internal and external medicines, all to no effect, I am, so far, cured by this Hampton's Vege able Tincture only. Therefore, my ear sir, accept of the assurance of my gratitude, and believe me your well wisher.

REV. VERNON ESKRIDGE, U. S. N. PORTSMOUTH, VA, Aug. 18, 1851. Mr. J. M. Boush-Dear sir: While I am, in general, opposed to patent medicines, cander compels me to state that I have great confidence in the virtues of Hampion's Vegetable Tincture. For several months past I have used it in my family; and in dyspepsia, loss of appetite, dizziness, and general de-bility, with entire success. So far as my experience extends, therefore, I take pleasure in recommending it to the afflicted as a safe and efficient remedy. I am, respectfully, yours,

VERNON ESERIDOR, Chaplain, United States Navy.

SHOCKING AND STARTLING CONFES

The Philadelphia Inquirer of Tuesday furnishes the following additional particulars relating to the awful crimes of Pamela Mvers:

We gave in yesterday's Inquirer an account of the arrest of Pamela Myers, lat Mr. Thomas Rice's house, on the Nicetown Lane, in the twenty-third ward charged with having very mysteriously made away with a number of her chil dren. We have been informed that she has voluntarily confessed to the officers that she had, at different times, within the past six years, given birth to six chil dren, which had either died about the time of their birth, or had been murdered by their mother! These children, which were all illegitimate, were the result of intercourse with different men, and to make the affair still more shocking, the uncle of the miserable woman, a man named Snyder, is charged with the paternity of two of them. Snyder is now in prison. He is a married man. He is also accused of having been accessory to the murder of some of the children. Pa mela, after her arrest, made a full confession of her crimes. The first child to which she gave birth, was born in the entry of her uncle's house. The mother had the small pox at the time, and the child took it and dien soon after. She was detected, however, a day or two before its death, in an attempt to suffocate it. The second child was choked by its mother after its birth, and was thrown

There was one disease called the black death, the black plague, or the great mortality. The most dreadful visitation of it was one that began in China, spread over Asia, and in the year 1348 entered Europe. Europe was then, however, not unused to plagues. Six others had made themselves famous during the preceding eight and forty years. The black plague spread from the south of Europe to the north, occupying about three years in its passage. In two years it had reached Sweden; in three years it had conquered men ripe to receive it. Europe was full in cities in unwholesome houses overlooking filthy streets, as in beleaguered to return to the model afforded by Noah's fortresses; for robbers, if not armies, occupied the roads beyond their gates. Husbandmen were starving feudal slaves; religion was mainly superstition; ignorance was dense, and morals were dechurches and monasteries, where, if the you intended them to grow, and they will monks, fearing to receive infection with grow. it, shut their gates against any such offering, it was desperately thrown to
